

OPEN TO ALL CII MEMBERS

## Benchmarking Public Companies' ESG and Cyber-Security Policies, Risk Factors, and Disclosures Against Key Financial Drivers

Curious about the status of ESG disclosures? Join us for a 360° view on material and non-material ESG disclosures in early 2021.

## Discover How Companies Are:

- 1 Conducting risk oversight at the board level on ESG and cyber-security
- 2 Equipped with board members' skills to oversee ESG and cyber-security risk
- 3 Discussing ESG and cyber-security Risk Factors
- 4 Meeting the new 10-K reporting mandates in the update to SEC Regulation S-K
- 5 Building executive compensation tie-ins for ESG and cyber-security
- 6 Being impacted by ESG shareholder proposals in 2021
- 7 Utilizing ESG frameworks like SASB, CDP, TCFD, UNGC, and GRI
- 8 Describing ESG and how it relates to key financial drivers as defined by the SASB Materiality Map.

## What we know.

### Cyber-Security

- 55% of R3000 companies have disclosed board oversight.
- 57% of companies with board-level cyber-security oversight task this to their Audit Committee but very few directors have any cyber/technology related background.
- Only 3% of those companies that have disclosed cyber-security oversight have committees dedicated to governing this risk.

### ESG

- 37% of R3000 companies have board oversight
- Of these, 71% have committees dedicated to this function.
